HIDDEN CHAMPION OF CLIMATE-FRIENDLY PETROL TECHNOLOGY

CAC ENGINEERING is an international leading plant engineering company and one of the top 3 global market leaders for synthetic petrol. MethaFuel® technology has proven itself on engine test benches and at numerous motorsport events – and celebrated its European premiere at the Classic petrol station in Kirchweyhe.

Tried and tested, climate-friendly and usable in any petrol engine without conversion: fuel expertise for classic cars, sports cars and everyday use – made in Germany.

ALWAYS AN **IDEA AHEAD**

ENERGY REIMAGINED – INTO THE FUTURE WITH GREEN METHANOL.

PARAFUEL develops innovative solutions in the field of renewable energies. The product focus is on green methanol (RFNBO grade). This energy carrier of the future will be synthesised from hydrogen and CO₂ using only renewable energy. Our goal: a sustainable energy future through intelligent technologies and efficient production processes.

With in-depth expertise and passion, we implement projects that combine environmental protection and the economy – for a greener and cleaner future.
